RE: Council Meeting Agenda Item - Resolution & Public Hearing for SMART Community Credits and Municipal Credits

Please consider this request to place on the agenda for the next City Council meeting to following item:

Request Council Resolution in support of SMART Municipal Credit and Community Credit Contract for FY-2010.

I have attached a copy of a similar resolution from last year. The SMART Municipal and Community Credit program provides the funding which allows us to operate the City's Senior/Handicapped Transportation Program.

Should you have any questions regarding this request please call me at 586-445-5480.

Cc: Parks & Recreation Board
Christine McCullum, Coordinator, Senior/Handicapped Van Transportation Program

COPY

MUNICIPAL CREDIT and COMMUNITY CREDIT CONTRACT FOR FY - 2010

I Anthony Lipinski on behalf of the City of Roseville apply to SMART for our *Municipal and Community Credits* for the period July 1, 2009 to June 30, 2010, and agree that the *Municipal and Community Credits Master Agreement* signed on October 4. 1996, is incorporated herein by reference, and forms part of this agreement. Specific terms, conditions, and budgetary projections are set forth in *Exhibits A and B* as necessary.

Our community agrees to use the $45,231 in **Municipal Credit** funds available to us as follows:

(1) Transfer of $ 0 to N/A
TRANSFEREE COMMUNITY

At the cost of: $ _____

(2) Van/Bus Operations (Including Charter and/or Taxi services) — At the cost of: $ 45,231

(3) Services Purchased from SMART (Including Tickets, Shuttle Services/Dial-a-Ride) — At the cost of: $ _____

Total $45,231

Our community agrees to use the $73,947 in **Community Credit** funds available to us as follows:

(1) Transfer of $ 0 to N/A
TRANSFEREE COMMUNITY

At the cost of: $ _____

(2) Van/Bus Operations (Including Charter and/or Taxi services) — At the cost of: $ _____

(3) Services Purchased from SMART (Including Tickets, Shuttle Services/Dial-a-Ride) — At the cost of: $ 73,947

(4) Capital Purchases — At the cost of: $ _____

Total $73,947

Capital purchases permitted with *Community Credits* are subject to applicable state and federal regulations, and SMART procurement guidelines. When advantageous, SMART may make procurements directly. Reimbursement for purchases made by a community requires presentation of proper documentation to support the purchase (i.e. purchase orders, receiving reports, invoices, etc.). Additional *Community Credit* dollars, available in FY 2010, may be required to serve local employer transportation needs per the coordination requirements set forth in the aforementioned Master Agreement.

Memo

To: Steve Truman, City Manager

From: Paul VanDamme, Purchasing Assistant

Date: October 22, 2009

Re: Single Source Vendor

Attached is Purchase Requisition # POLC1433 requested by Deputy Chief Berlin. This is a single source vendor for this style gun range. The GSA Contract #GS-07F-0629N quotation amount from Meggitt Training System Inc, Suwanee, Georgia is $130,675.00. Meggitt Training (Formally Caswell / Detroit Armor Companies) is the original supplier of the current indoor firearms training equipment.

This is a federally funded project. This makes the project inapplicable from the Resolution on Policy to Assure Labor Harmony on City Projects per Mr. Tomlinson.

This project will be charged against two funds. The grant fund 101-101-501.000 and will be reimbursed by the Byrne Grant and DEA Forfeiture Fund. Council will have to approve this purchase due to it being a single source vendor.

If you have any questions please contact Deputy Chief Berlin or myself.

Roseville Mi. 48066

Dear Sir:

As you are well aware, the single greatest liability facing our police officers on a daily basis is the use of deadly force. Thankfully the use of such force has rarely been necessary, however times have changed and the propensity for violence by some of our citizens is growing each day. To combat that threat, and to enhance our officer's ability respond appropriately, the Roseville Police Department has maintained an aggressive firearms training program. This program has been greatly enhanced by the use of our own firearms gun range located in the lower level of the police department.

The current in use firearms range was installed in 1983 by the Detroit Bullet Trap Corporation now Meggitt Training Systems. This facility has exceeded everyone's expectations, relating to durability and longevity. However, with passage of time and continual use the bullet traps have degraded to a point of being unsafe. The target retrievers, retriever motors and control box have not been functional for several years as spare parts are no longer available to maintain the system. The inability to use the range to its full design capability has greatly deterred the types of training we have been able to conduct. During the spring 2009 department firearm qualifications it was found that the bullet traps were allowing bullet fragments to ricochet back onto the gun range, creating a highly hazardous condition. An inspection of the traps found that metal fatigue from bullet strikes had caused several of the welds to fail, and bullets to actually penetrate the traps themselves. At that time, for the safety of all, the range was closed to all firearm use.

In order to maintain our officers' firearms proficiency and to ensure that our officers' are trained to deal with any type of critical incident, the police department would like to replace the current in place range with a modern firearms training range this from Meggitt Training Systems. Meggitt Safety Systems, as Detroit Bullet Trap Corporation, built the original firearms range and several of the component parts are proprietary to there company. As a result, we can experience substantial cost savings with Meggitt Safety Systems, as they will be able to retrofit the current in place firearms booths and target retriever tracks for use with the new bullet trap system. Said parts of the existing range, are still functiona,l and are able to be retrofitted but would have to be replaced if another vendor was used increasing cost.

Currently, the police department shoots all lead free frangible ammunition due to health concerns associated with air borne lead particles. Minute particles of lead become airborne after the bullet strikes the armor bullet traps. The bullet trap system we are proposing to purchase is proprietary to Meggitt Safety Systems and incorporates a bed of granulated rubber covered with a rubber membrane, which encapsulates the bullet upon impact. As the bullet remains intact upon striking the rubber and is totally encapsulated it prevents the release of airborne lead particles. This would allow the Roseville Police Department to return to the use of ball ammunition for training purposes. As the cost of lead free frangible ammunition is approximately three times the cost of ball ammunition, the city would

experience a significant cost savings each year in the purchase of practice ammunition, this cost savings would essentially allow the range to pay for itself over time.

While the proposed cost of the new range systems is substantial, the entire project would be funded through monies from the Federal Government. The Roseville Police Department has obtained two, United States Department of Justice, Byrne Justice Assistance grants that would pay for approximately half of the total cost of the range system with the remainder being covered by United States Drug Enforcement Administration forfeiture funds. By using these funds in this way, would eliminate the need for the taxpayers of the City of Roseville to fund any portion of this badly needed project.

In researching the various manufacturers of range systems, writer feels that the Meggitt Safety Systems, Gran Trap range would provide the best overall value to the Roseville Police Department. This system would contain the hazards of lead contamination and bullet ricochet, protecting our officers from harm while at the same time not compromising any aspect of the vital training that must be maintained in order to serve our citizens and protect our officers.

Sincerely,

James P. Berlin
Deputy Chief of Police

MTSI PROPOSAL NO.: **MTS09USL3244 Rev 2**
Re: Indoor LE Range Renovation

Deputy Chief Berlin:

Meggitt Training Systems, Inc. (MTSI) herewith offer our quotation price of $130,675.00 (One Hundred Thirty Thousand, Six Hundred and Seventy-Five US dollars) for the furnishing, delivery F.O.B. jobsite, equipment and services listed herein. In addition to the quotation price, you will be responsible for all Federal, State, and Local Taxes, Licenses, Permits, Bonds and Fees applicable to the sale. This quotation is valid for 60 days from the date hereof.

Payment Terms are 100% net 30 days. Any deviation must be mutually agreed upon in writing.

Delivery is typically 60-90 days after receipt of order and upon return and approval of MTSI Submittal Drawings. This quotation and attached pages will be attached to and made part of any forthcoming purchase order. Indication of acceptance shall be by authorized signature in the space provided at the bottom of each page of the quotation herein.

If you should require any further information or assistance, please contact your sales representative, Mr. Tracy A. Newton (ph: 815-337-1376, e-mail: tracy.newton@meggitt.com).

Regards,

RE: Shooting Range Renovation Project – Sole Source Letter

Deputy Chief Berlin,

Meggitt Training System (formally Caswell / Detroit Armor Companies) is the original supplier of your indoor firearms training equipment. As you're likely aware, this equipment was originally installed back in 1984. Our proposal for your current project includes the removal of the existing bullet trap, existing target mechanisms and related cleaning of the range area. Meggitt will then install our model #LE7500-OTR GranTrap and other related equipment – as listed on our July 22nd, 2009 quotation. Meggitt is the only supplier of the GranTrap with all of the important Function and Safety features listed below.

- **STEPPED BED PLATES**. This features helps retain the GranTex material and spent rounds in place & maintaining the proper rubber granulate thickness. Other rubber traps simply give you a pile of rubber on a "Slanted" plate - which would allow the rubber materials and rounds to prematurely "Slosh" out at the traps bottom – so constant service / shoveling it back up is needed.

- **BACK UP SAFETY BIN.** This separately contained area at the traps rear is a means of further protection / containment. We created this design for additional safety – just in case a range operator momentarily does not detect that their rubber levels are not properly maintained.

- **UPPER SLOPE SHEET.** Our design has a structurally supported 3/8" thick / 500 BHN Armor plate. This provides further protection to the area/s just above & beyond the bullet trap – such as exhaust duct work, electrical conduits etc. Additionally, this slope sheets acts as a rubber replenishment bin / storage area. As the GranTrap is used and as the rubber moves around – this additional material slides down to refill the voids.

- **RUBBER COVER.** Our rubber cover design is for keeping other range debris (cardboard and paper target material, shotgun wadding etc) out of the rubber granulate. This lessens future cleaning burdens. The rubber cover also assists in keeping the granulate material in place.

- **CLEAN RUBBER.** Meggitt uses a clean /pure rubber material & not the chewed up car tire looking materials (with cording, belting etc) that you see with other manufacturers.

I am also attaching a reference list of other recent MTS installations. As you will see, many are renovation type projects such as yours - that involve the removal of an old steel trap and the installation of our GranTrap.
