NOTICE TO RESIDENTS WALDORF STREET RECONSTRUCTION

This letter is to advise you that the Waldorf Street Reconstruction Project is scheduled to begin on August 22, 2016 and the contractor will be Mark Anthony Construction.

The construction limits are from Frazho Road to Marquette Street. The construction is expected to be completed by October 14, 2016 with restoration being completed by October 28, 2016, weather permitting.

The construction will take place in two stages. Stage one will be the south half of street being removed and repaved from Frazho Road to 26214 Waldorf which will start August 22, 2016 and be completed September 16, 2016, weather permitting. Stage two will be the north half of the road from 26215 Waldorf to Marquette Street being removed and repaved beginning September 19, 2016 and completed by October 14, 2016, weather permitting.

Approaches replaced as part of this project are at no cost to property owners. Service walks between the street and sidewalk will be eliminated during the paving project. Should any sidewalk require replacement during this project it will be at no cost to the property owner.

There will be limited parking on Waldorf from Frazho Road to Marquette Street until the construction is complete. Residents on Waldorf may park on adjoining side streets. All residents with access should park vehicles in their driveway to leave street parking for the residents without access to their driveways during construction. There will be **no parking on the west side of Waldorf** throughout the construction to maintain access to the hydrants and passage of emergency vehicles.

The mail service will be not be interrupted by the construction.

Trash pick up will be handled by the contractor. Please place your trash out as usual at the end of your drive (after 6:00 PM the previous evening or before 7:00 AM on the day of pick up) and it will be taken to the nearest available location for pick up. We ask that you mark your address in **bold letters** on your trash and recycling containers to assist in the return. If possible, please use brown kraft bags for grass clippings rather than cans.

Please remove any landscaping installed in the City right-of-way. Mark sprinkler heads located in the City right-of-way as MISS DIG does not have a record of these and if marked there will be less chance of damage. During the removal of sidewalk, approaches and the street anything in the right-of-way will also be removed and discarded.

A Facebook group page has been created for this project. It can be found by typing [Waldorf Street Reconstruction Roseville Michigan](#) into the search bar on Facebook. This page will provide updates on the construction schedule. Please request to join the group and you will be verified.

At this time, we would like to apologize for any inconvenience. We thank you for your patience and cooperation during this project. If you have any questions please contact the City of Roseville Engineering Department at (586) 445-5445.
